Essentials for Primary Care Psychiatry 2021 Virtual Conference

*Hosted by: UCI/UC Davis Train New Trainers
Primary Care Psychiatry Fellowship*

**Friday, January 29
& Saturday, January 30**

**8 a.m. - 4 p.m. PT
Virtual Event**

**Registration is required:
\$295 Physicians
\$265 Other Healthcare Professionals**

**Virtual conference site and instructions will be
provided a week prior to conference to all
registered attendees.**

This two-day conference for primary care providers and other health professionals will integrate recent scientific data with current clinical practice regarding: mood, anxiety, psychotic, substance misuse, pain related disorders, pandemic psychiatry, and how to do a primary care psychiatric assessment.

Learning Objectives:

- Effectively diagnose and treat depression and other common psychiatric conditions in the primary care setting
- Identify when it is appropriate to seek mental health consultation/referral
- Utilize motivational interviewing to assess readiness for change and activate motivated patients along the continuum of change behavior
- Identify evidence-based treatments available in primary care settings for substance misuse disorders
- Effectively screen for substance misuse
- Review and compare the DSM 4 and DSM 5 diagnostic criteria for disorders related to somatization
- Discuss evidence-based management for somatic symptom disorders and review the core features of cognitive behavioral therapy
- Understand the importance of screening for other psychiatry disorders when considering management for somatic symptoms
